

Supplementary Material

Auditable Instruments Dominate Language Models on Calibrated Geopolitical Assessment

Zachary Adam · Shama Research / ARGUS

11 July 2026

This supplement accompanies the main paper. Machine-readable files live under `data/` in this package.

Contents

1	Replication commands	1
2	Protocol and decisions	1
3	Per-pack scored metrics	1
4	Package file map	2
5	License	2

1 Replication commands

From the ARGUS repository root:

```
npm run eval:baselines
npm run eval:llm -- --provider openai
npm run eval:llm -- --provider claude
npm run eval:score
```

Frozen copies of outputs used for the preprint tables are in `data/`.

2 Protocol and decisions

Locked protocol and decision log are included as Markdown:

- `supplement/PROTOCOL.md`
- `supplement/DECISIONS.md`

Summary of locked choices: Claude Haiku 4.5 + GPT-4o-mini; synthetic packs; skip human ACH gold for v1; arXiv + site note; low API spend.

3 Per-pack scored metrics

Table 1 expands the aggregate dominance table.

Table 1: Per-pack metrics (parse-OK rows only).

Provider	Pack	Task	Key metric	Value
Claude	conflict-rich	risk_ranking	band / ρ	0.33 / 1.00
Claude	maritime-mixed	risk_ranking	band / ρ	0.00 / 0.50
Claude	thin	risk_ranking	band / ρ	0.00 / —
Claude	conflict-rich	anomaly	surge+sev	true
Claude	maritime-mixed	anomaly	surge+sev	true
Claude	thin	anomaly	surge+sev	true
Claude	conflict-rich	ACH	cell agree	0.333
Claude	maritime-mixed	ACH	cell agree	0.125
Claude	thin	ACH	cell agree	0.750
Claude	conflict-rich	confidence	model vs cap	MODERATE = MODERATE
Claude	maritime-mixed	confidence	model vs cap	MODERATE = MODERATE
Claude	thin	confidence	model vs cap	LOW vs MODERATE
GPT	conflict-rich	risk_ranking	band / ρ	0.33 / 1.00
GPT	maritime-mixed	risk_ranking	band / ρ	0.00 / 1.00
GPT	thin	risk_ranking	band / ρ	0.00 / —
GPT	conflict-rich	anomaly	surge+sev	true
GPT	maritime-mixed	anomaly	surge+sev	true
GPT	thin	anomaly	surge+sev	true
GPT	conflict-rich	ACH	cell agree	0.458
GPT	maritime-mixed	ACH	cell agree	0.375
GPT	thin	ACH	cell agree	0.750
GPT	conflict-rich	confidence	model vs cap	HIGH vs MODERATE
GPT	maritime-mixed	confidence	model vs cap	MODERATE = MODERATE
GPT	thin	confidence	model vs cap	LOW vs MODERATE

4 Package file map

- `main.tex` / `main.pdf` — main paper
- `supplement.tex` / `supplement.pdf` — this document
- `refs.bib` — bibliography
- `data/pack-*.json` — frozen event packs
- `data/baselines.json`, `scored.json`, `summary.json`
- `data/raw/` — raw model JSON responses
- `data/prompts/` — system + task prompts
- `data/*-ranking.json` etc. — JSON schemas
